

ENGLISH

The ZEISS Group, a technology company that leads the market for optics and optoelectronics, develops and distributes semiconductor manufacturing equipment, measuring technology, microscopes, medical technology, eyeglass lenses, photography and film lenses, binoculars and technology for Planetariums for medical technology such as research, industrial solutions and consumer optics.

Currently Carl Zeiss in Spain and Portugal is composed of three distinct business units covering the areas of Medicine, Industrial Metrology, Microscopy, Planetariums and Ophthalmic Lenses.

SCG will hold a Kaizen workshop in May to focus on improving end-to-end cross-cutting processes and all people in different departments involved. This workshop is the first in a series of individual training modules for certain Lean tools that will be taught at Zeiss throughout this and next year 2018, aimed at the effective implementation of continuous improvement.
